Apex Developer

(kinda)

My third app... ever.
That's how easy SFMobile SDK is to learn.

WE HAVE A PROBLEM

SaleForce multiple invitee events could be better.

- Better UX for inviting multiple attendees.
- Need a mechanism to determine who attended.

The screenshot shows a Salesforce Developer Edition browser window. The top navigation bar includes 'Safari', 'File', 'Edit', 'View', 'History', 'Bookmarks', 'Develop', 'Window', and 'Help'. The address bar shows 'https://na9.salesforce.com/00U/e'. The page title is 'Calendar: New Multi-Person Calendar Event ~ salesforce.com - Developer Edition'. The main content area is titled 'Calendar Details' and includes fields for 'Assigned To' (Mike Critz), 'Location' (McCravey Auditorium), 'Subject' (Faculty Meeting), 'Start' (9/7/2014 9:00 AM), 'End' (9/7/2014 12:00 PM), and 'Name' (Contact: Tim Barr). A 'Recycle Bin' button is visible on the left. A large text box in the center contains the message: 'All 1,700 faculty are to be debriefed on university policies & regulations for the new year. ** ATTENDANCE IS MANDATORY **'. Below this, there is a 'Selected List' table with columns 'Name', 'Title', and 'Account/Company'. The table lists three invitees: John Bond (VP, Facilities, Grand Hotels & Resorts Ltd), Jane Grey (Dean of Administration, University of Arizona), and Jack Rogers (VP, Facilities, Burlington Textiles Corp of America). The bottom of the page shows a copyright notice: 'Copyright © 2000-2012 salesforce.com, inc. All rights reserved.' and a 'Chat' button.
